A company implements Dynamics 365 for Finance and Operations. It sets up and configures the system to support reporting requirements using Microsoft Power BI.

The customer service manager wants to create reports in Power BI for analyzing customer order patterns, order fulfillment metrics, customer satisfaction KPIs, and customer service representative goal metrics. These reports compare aggregated information across multiple demographic regions and business lines for current trends against historic information.

The manager would like to use the reports to make individual team performance more visible to the managerial and executive teams. Since reports will be used by those teams as well as mobile users, the manager would like the report response to reflect the latest data without requiring the user to wait.

You need to determine which tool or functionality best fits the scenario.

Which feature or functionality should you use? To answer, select the appropriate feature or functionality in the dialog box in the answer area.

NOTE: Each correct selection is worth one point

Scenario	Feature or functionality
Stage the aggregate data for use by the reports.	☐ Dynamics 365 system administration settings ☐ Power BI desktop client ☐ Lifecycle Services

You manage a Dynamics 365 Finance environment.

You create a new Microsoft Azure SQL Database instance.

You need to copy data from specific Dynamics 365 entities to the new database instance.

Which three actions should you perform in sequence before creating a data project? To answer, move three actions from the list of actions to the answer area and arrange them in the correct order.

+

The screenshot shows a Microsoft Dynamics 365 interface with a list of actions on the left and an empty answer area on the right. The actions are:

- Disable the Run business validation option from the data entities.
- In Data management, open Configure entity export to database
- Enable set-based processing for the data entities.
- Select the connection string of the Azure SQL database.
- Publish the data entities to be exported.

The answer area is empty and contains up and down arrow buttons for reordering.

Answer:

The screenshot shows the same Microsoft Dynamics 365 interface, but with three actions moved from the list to the answer area. The actions in the list are:

- Disable the Run business validation option from the data entities.
- In Data management, open Configure entity export to database
- Enable set-based processing for the data entities.
- Select the connection string of the Azure SQL database.
- Publish the data entities to be exported.

The answer area contains the following actions in order:

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a functional consultant who is deploying Dynamics 365 for Finance and Operations.

The implementation must:

- * Use an iterative approach
- * Integrate with real-world data
- * Enforce standards and governance
- * Implement multiple rounds of feedback

You need to deploy and validate the implementation.

Solution: Deploy the out-of-the-box solution. Enable users to customize the solution based on individual user scenarios.

Does the solution meet the goal?

A. Yes

B. No

Topic 4, Adventure Works Cycle

Background

Current environment

Adventure Works Cycles is a high-end bicycle manufacturer in North America founded in 2010.

The company has standard bicycles available year round in addition to limited-edition bicycle models released domestically several times per year to boutique retailers.

The limited-edition bicycles are the most successful. They have high margins, are in high demand, and have a fervent following with the younger bicycle community that wants to make a

social statement. Most consumers become aware of the other Adventure Works Cycles bicycles through these limited editions.

Adventure Works Cycles wants to triple its manufacturing capabilities and expand to countries/regions in South America, Western Europe, and United Arab Emirates (UAE) over the next few years.

General

To facilitate these expansions, Adventure Works Cycles has decided to invest in Dynamics 365 Finance, Dynamics 365 Supply Chain Management, and the Power Platform products to digitally innovate from a custom-built enterprise resource plan (ERP), and Microsoft Excel worksheets.

Adventure Works Cycles sells only to North America and Canada but still cannot keep up with current demand. Over time, market expansion will be the only way to remain profitable.

Expansion has been limited in the past due to legal requirements and regulations around document formatting and the lack of a developer.

Adventure Work Cycles has no capabilities or budget to undertake any development past the Excel formula-level tasks.

There are no formal change management procedures.

Sales

There are three distinct sales teams:

An internal sales team (B2B)

- Sells to retailers.
- Submits orders via EDI, email, or call-in.

A street sales team (B2C)

- Sells directly to high profile or social media influencer consumers.
- Provides customers with discounts or has marketing arrangements in exchange for driving sales to retailer-direct sales channels
- Submits orders by using email or call-in because pricing and terms must be negotiated.

An Adventure Works Cycles administrative sales team

- Has same responsibilities and activities as the internal sales team.
- Coordinates the management activities of the B2B and B2C teams.

Products

Before new bike models are unveiled through social media, it can be difficult for the street team representatives to show customers and retailers the new products with the most up-to-date information because the product is still being manufactured.

Often the data and images for the products are out of date.

The internal sales team uses the Dynamics 365 Supply Chain Management product from to show this information to customers.

For questions about bike-specific warranties and service level agreements, consumers can contact Adventure Works Cycles directly through the active Adventure Works Cycles social media pages. The company expansion will put a strain on the manual interactions of answering questions.

Information and attributes change often.

International compliance

Sales are currently restricted to the US only.

Requirements

General

No coding is in scope for the project.

Change management operations need to be implemented.

A One Version strategy needs to be implemented.

The most critical business processes must never break when the software updates to the newest version.

No third-party testing tools will be used. Adventure Works Cycles wants to use everything in the Microsoft stack if there is an option available.

Because the company is at capacity with the overwhelming demand, the testing process must be done without users running through the processes every time the software updates.

With the different bike configurations, Adventure Works Cycles would like to use a single business process but test against 10 different data configurations to streamline errors against data variations in the manufacturing process.

Data administrator

A single person, the Adventure Works Cycle data administrator, will be tasked with owning all reporting and data tasks.

This one person will need to intimately know all entities and fields, in addition to any changes in the new versions of the software.

Adventure Work Cycles users will inquire with the data administrator about certain data they need to view. The data administrator needs to quickly search data entities by field names and advise users on how to extract data into their own Excel templates for ad hoc reporting and data management tasks.

Data migration

The data cleansing and loading into Dynamics 365 will be done by the Adventure Works Cycles data administrator.

With the many changes for the products and data, imports for the data loads must be repeatable and consistent.

The different data loading components will all be done at one time.

After the import order and cadence is done correctly in a test environment, that same process must be reliably replicable for the golden configuration, in addition to any environment refreshes going forward.

Any errors on the data loading must identify the issue for the person to address and fix for future loads.

Sales

The sales street team must be able to view and edit (only product descriptions) near real-time information from the Dynamics 365 system about products on their personal mobile phones.

No street team representatives will have access to the Dynamics 365 Supply Chain Management application, but they must be able to enter orders and update customer information into the system without Adventure Works Cycles assistance.

The Adventure Works Cycles internal sales support team must be able to see all street team sales orders entered to provide support, but the internal team should not see any information around the commissions configured on the orders.

The sales support team must be able to see all orders and fields for the different sales teams. No other security differences from a Dynamics perspective are needed.

Products

Warranty and Service Level Agreements stored in Dynamics 365 for the different products must not be exposed directly to sales representatives.

The representatives must be able to pose questions from customers and retailers and get answers back almost immediately.

Any opportunity to extend this type of product inquiry and support mechanism to customers and retailers must be evaluated.

The data for all of the product information must be easily extractable back into Excel.

International compliance

Payments and invoices inbound and outbound must be converted or translated to the correct localized format. Regardless of regulatory compliance, the customer-facing business documents must have a unique template for each country that can be designed within Microsoft Office applications. These documents must be embedded in Dynamics 365 forms for data export and configurable by non-developers.

Munson's Pickles and Preserves Farmは、RelecloudのクラウドPOSソフトウェアを使用して、ファーマーズマーケットで農産物を販売している会社です。Munson'sはRelecloudの最初の顧客の1つであり、Relecloudは従業員のランチルームにMunsonの製品を在庫しています。Munson'sはまた、従業員をRelecloudに下請けして、最高のソリューションを機能的に構築できるように支援しています。マンソンの従業員は、複数の組織的地位を担っています。各従業員は、人々が彼らに連絡できる単一の電子メールアドレスしか持っていません。

現在の環境 :システムとIT

* Dynamics 365 for FinanceandOperationsが最近更新されました。

- *システム内のすべての定期的なバッチジョブが削除され、再作成されました。
- *アラート通知のバッチ処理は、最近10分ごとから2時間ごとに変更されました。
- *情報のリアルタイムレポートは必要ありません。

現在の環境 :カスタマーサービス

- *顧客の信用要求は、顧客サービスチームを通じて入力されます。
- *すべてのリクエストには、日付、時刻、リクエストの理由、およびクレジットアクションの最初の推奨事項に関するカスタマーサービスのメモが含まれている必要があります。
- *お客様には、Relecloudポータルへのサポートチケットを入力できる複数の連絡先があります。
- *チケットは、サポート技術者によって作成されるときに、サポートチームのサードパーティシステムで自動的に生成されます。
- * Dynamics 365電子メールクライアントメールは、顧客とのやり取りに使用されます。

現在の環境 :テクニカルサポート/ IT

- * Relecloudソフトウェアで技術的な問題が発生した場合、テクニカルサポートチームが関与します。
- 問題に応じて、サービスチケットが入力され、チームにエスカレーションされます。
- * Microsoft Flowは、さまざまなワークストリームを自動化するために使用されます。
- *ワークフローは、Dynamics 365 FinanceandOperationsのテクニカルサポートリクエストフロー用に構成されていません。
- *テクニカルサポートチケットの管理と履歴は、サードパーティの問題管理ソリューションで処理されます。
- *テクニカルサービスチームは、RelecloudPOSおよびDynamics365アプリケーションに関連する問題を管理します。

現在の環境 :アカウント担当者

- *各顧客には1人のアカウント担当者が割り当てられます。
- *アカウント担当者は複数のデバイスを使用します。
- *クレジットを承認できるのはアカウント担当者のみです。
- *顧客へのすべての電子メールは、独自のOutlookインスタンスを介して送信されます。

現在の環境 : 財務

- *顧客は請求書アカウントを持っていません。
- *クレジットを入力できるのは財務リソースのみです。*クレジットは、クレジットと払い戻しのセキュリティロールが割り当てられた4つの財務リソースのいずれかによって入力できます。
- *リクエストが4日以内に更新されていない場合、リクエストはコントローラーにエスカレーションされます。これが発生した場合は、アカウント担当者にアラートを送信する必要があります。

要件 :テクニカルサポート/ IT

- *サポート技術者は、未解決の問題を解決するためにMicrosoftの既存のナレッジベースを使用する必要があります。
- *問題が存在する場合、サポート技術者は毎週問題のステータスを報告する必要があります。

*既存のサポートリクエストがない場合、サポート技術者はMicrosoft評価用にサポートリクエストを作成する必要があります。

*可能な場合は、すべてのソフトウェアを一元的にインストールする必要があります。

* Dynamics 365 Finance and Operationsの本番環境では、東部標準時の午前4時から7時まで毎週土曜日の更新頻度が必要です。

*更新は別の環境でテストする必要があります。

要件 :アカウント担当者

*アカウント担当者は、ダッシュボードから関連する顧客フィールドとレコードのみを自動的に表示できる必要があります。

*アカウント担当者は、顧客のリストをMicrosoft Excelにエクスポートできる必要があります。

*アカウント担当者は、編集またはレコード入力タスクのために顧客マスターレコードに移動できる必要があります。

*フォームは、各アカウント担当者のニーズに基づいて関連している必要があります。

*アカウント担当者は、複数のデータコンポーネントを表示するために一元化された場所が必要です。

*アカウント担当者は、必要なフィールドのみを含むExcelの現在の顧客のオフラインリストを必要とします。

* ITディレクターは、アカウント担当者が会社を辞めた場合、アカウント担当者の顧客連絡先のすべてのインスタンスを再割り当てする必要があります。

*クレジットが発行されたとき、または顧客の記録のデータが変更されたときに、アラートをアカウント担当者に自動的に送信する必要があります。

要件 : 財務

*払い戻しは、物理的な小切手として印刷する必要があります。

*すべてのプリンターは、金融法人専用である必要があります。

問題

*検索ボックスに「pickle」と入力しても、アカウント担当者に結果は返されません。

*最新の更新後、アカウント担当者は、顧客の連絡先が変更されたときにアラート通知を受信しなくなったことを報告します。

*アカウント担当者が最近辞任しました。

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company's Dynamics 365 Commerce production instance is updated monthly as new versions of the software are released.

The company needs to identify any potential issues in new releases. They do not have developers to help with this initiative.

You need to implement a way to regression test scenarios.

Solution: Use the Acceptance Test Library (ATL) framework to create regression test scenarios for critical business processes that do not require any X++ code changes.

Does the solution meet the goal?

A. Yes

B. No

A company implements Dynamics 365 for Finance and Operations. It sets up and configures the system to support reporting requirements using Microsoft Power BI.

The customer service manager wants to create reports in Power BI for analyzing customer order patterns, order fulfillment metrics, customer satisfaction KPIs, and customer service representative goal metrics. These reports compare aggregated information across multiple demographic regions and business lines for current trends against historic information.

The manager would like to use the reports to make individual team performance more visible to the managerial and executive teams. Since reports will be used by those teams as well as mobile users, the manager would like the report response to reflect the latest data without requiring the user to wait.

You need to determine which tool or functionality best fits the scenario.

Which feature or functionality should you use? To answer, select the appropriate feature or functionality in the dialog box in the answer area.

NOTE: Each correct selection is worth one point

You are a Dynamics 365 Finance security administrator.

When testing security setups, users report that certain roles are gaining access to sensitive information via a form in the system.

You must investigate which user roles have what visibility and access level to system objects, and then send a report to the implementation team to address security compliance concerns.

You need to report the information from the system.

Solution: Generate the Security role access report.

Does the solution meet the goal?

A. Yes

B. No

You are tasked with setting up Case management in the Dynamics 365 for Finance and Operations deployment for your organization.

Your organization must use cases to track defect and enhancement reports for products, so that engineers can improve products over time. Only appropriate employees within the organization should have access to cases and related information.

- * Call center employees create thousands of service cases and ensure that the proper resources are allocated for each service.
- * Service department employees fix cases created by the call center and create cases for defects and enhancement suggestions when they identify them.
- * Engineers review the cases from the service department while planning and designing the next version.

You need to configure the tool to enable tracking of service cases and product defects and enhancements.

Which Case management settings should you choose for each category or categories? To answer, select the appropriate options in the answer area.

Answer: D ([メッセージを残す](#))

トピック1、Relecloudケース

バックグラウンド

Relecloudは、消費者向け食品スタンドに直接特化したクラウドPOS (Point of Sale) ソフトウェア会社です。アカウント管理、テクニカルサポート、カスタマーサービス、およびファイナンスの顧客対応担当者を含む、新しいDynamics 365 FinanceandOperationsの実装を使用する複数のビジネスユニットがあります。2つの法人があります。1つは運用用、もう1つは財務用です。顧客はRelecloudPOSソフトウェアの料金を毎月支払い、すべてがクラウドにデプロイされます。DynamicsインスタンスのURLは<https://relecloudprodoperations.dynamics.com>です。

Munson's Pickles and Preserves Farmは、RelecloudのクラウドPOSソフトウェアを使用して、ファーマーズマーケットで農産物を販売している会社です。Munson'sはRelecloudの最初の顧客の1つであり、Relecloudは従業員のランチルームにMunsonの製品を在庫しています。Munson'sはまた、従業員をRelecloudに下請けして、最高のソリューションを機能的に構築できるように支援しています。マンソンの従業員は、複数の組織的地位を担っています。各従業員は、人々が彼らに連絡できる単一の電子メールアドレスしか持っていません。

現在の環境 :システムとIT

- * Dynamics 365 for FinanceandOperationsが最近更新されました。
- * システム内のすべての定期的なバッチジョブが削除され、再作成されました。
- * アラート通知のバッチ処理は、最近10分ごとから2時間ごとに変更されました。
- * 情報のリアルタイムレポートは必要ありません。

現在の環境 :カスタマーサービス

- * 顧客の信用要求は、顧客サービスチームを通じて入力されます。
- * すべてのリクエストには、日付、時刻、リクエストの理由、およびクレジットアクションの最初の推奨事項に関するカスタマーサービスのメモが含まれている必要があります。
- * お客様には、Relecloudポータルへのサポートチケットを入力できる複数の連絡先があります。
- * チケットは、サポート技術者によって作成されるときに、サポートチームのサードパーティシステムで自動的に生成されます。
- * Dynamics 365電子メールクライアントメールは、顧客とのやり取りに使用されます。

現在の環境 :テクニカルサポート/ IT

- * Relecloudソフトウェアで技術的な問題が発生した場合、テクニカルサポートチームが関与します。問題に応じて、サービスチケットが入力され、チームにエスカレーションされます。
- * Microsoft Flowは、さまざまなワークストリームを自動化するために使用されます。
- * ワークフローは、Dynamics 365 FinanceandOperationsのテクニカルサポートリクエストフロー用に構成されていません。
- * テクニカルサポートチケットの管理と履歴は、サードパーティの問題管理ソリューションで処理されます。
- * テクニカルサービスチームは、RelecloudPOSおよびDynamics365アプリケーションに関連する問題を管理します。

現在の環境 :アカウント担当者

- * 各顧客には1人のアカウント担当者が割り当てられます。

*アカウント担当者は複数のデバイスを使用します。

*クレジットを承認できるのはアカウント担当者のみです。

*顧客へのすべての電子メールは、独自のOutlookインスタンスを介して送信されます。

現在の環境：財務

*顧客は請求書アカウントを持っていません。

*クレジットを入力できるのは財務リソースのみです。

*クレジットは、クレジットと払い戻しのセキュリティロールが割り当てられた4つの財務リソースのいずれかによって入力できます。

*リクエストが4日以内に更新されていない場合、リクエストはコントローラーにエスカレーションされます。これが発生した場合は、アカウント担当者にアラートを送信する必要があります。

要件 :テクニカルサポート/ IT

*サポート技術者は、未解決の問題を解決するためにMicrosoftの既存のナレッジベースを使用する必要があります。

*問題が存在する場合、サポート技術者は毎週問題のステータスを報告する必要があります。

*既存のサポートリクエストがない場合、サポート技術者はMicrosoft評価用にサポートリクエストを作成する必要があります。

*可能な場合は、すべてのソフトウェアを一元的にインストールする必要があります。

* Dynamics 365 Finance and Operationsの本番環境では、東部標準時の午前4時から7時まで毎週土曜日の更新頻度が必要です。

*更新は別の環境でテストする必要があります。

要件 :アカウント担当者

*アカウント担当者は、ダッシュボードから関連する顧客フィールドとレコードのみを自動的に表示できる必要があります。

*アカウント担当者は、顧客のリストをMicrosoftExcelにエクスポートできる必要があります。

*アカウント担当者は、編集またはレコード入力タスクのために顧客マスターレコードに移動できる必要があります。

*フォームは、各アカウント担当者のニーズに基づいて関連している必要があります。

*アカウント担当者は、複数のデータコンポーネントを表示するために一元化された場所が必要です。

*アカウント担当者は、必要なフィールドのみを含むExcelの現在の顧客のオフラインリストを必要とします。

* ITディレクターは、アカウント担当者が会社を辞めた場合、アカウント担当者の顧客連絡先のすべてのインスタンスを再割り当てする必要があります。

*クレジットが発行されたとき、または顧客の記録のデータが変更されたときに、アラートをアカウント担当者に自動的に送信する必要があります。

要件：財務

*払い戻しは、物理的な小切手として印刷する必要があります。

*すべてのプリンターは、金融法人専用である必要があります。

問題

- *検索ボックスに「pickle」と入力しても、アカウント担当者に結果は返されません。
- *最新の更新後、アカウント担当者は、顧客の連絡先が変更されたときにアラート通知を受信しなくなったことを報告します。
- *アカウント担当者が最近辞任しました。

You work with a systems administrator for Dynamics 365 for Finance and Operations.

The system has been configured to prompt users for how they want to send emails based on the given scenario they are encountering. In certain situations, they will want to generate an email to forward to an account executive who doesn't have access to Dynamics 365 for Finance and Operations. Other times, the emails should be either sent as an attachment to a user email or through a generic no reply email.

You need to determine which configuration to provide to the file system administrator for the given scenario.

Which option should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Background

Current environment

Adventure Works Cycles is a high-end bicycle manufacturer in North America founded in 2010. The company has standard bicycles available year round in addition to limited-edition bicycle models released domestically several times per year to boutique retailers.

The limited-edition bicycles are the most successful. They have high margins, are in high demand, and have a fervent following with the younger bicycle community that wants to make a social statement. Most consumers become aware of the other Adventure Works Cycles bicycles through these limited editions.

Adventure Works Cycles wants to triple its manufacturing capabilities and expand to countries/regions in South America, Western Europe, and United Arab Emirates (UAE) over the next few years.

General

To facilitate these expansions, Adventure Works Cycles has decided to invest in Dynamics 365 Finance, Dynamics 365 Supply Chain Management, and the Power Platform products to digitally innovate from a custom-built enterprise resource plan (ERP), and Microsoft Excel worksheets.

- * Adventure Works Cycles sells only to North America and Canada but still cannot keep up with current demand. Over time, market expansion will be the only way to remain profitable.

- * Expansion has been limited in the past due to legal requirements and regulations around document formatting and the lack of a developer.

- * Adventure Work Cycles has no capabilities or budget to undertake any development past the Excel formula- level tasks.

- * There are no formal change management procedures.

Sales

There are three distinct sales teams:

- * An internal sales team (B2B)

- Sells to retailers.

- Submits orders via EDI, email, or call-in.

- * A street sales team (B2C)

- Sells directly to high profile or social media influencer consumers.

- Provides customers with discounts or has marketing arrangements in exchange for driving sales to retailer-direct sales channels

- Submits orders by using email or call-in because pricing and terms must be negotiated.

- * An Adventure Works Cycles administrative sales team

- Has same responsibilities and activities as the internal sales team.

- Coordinates the management activities of the B2B and B2C teams.

Products

- * Before new bike models are unveiled through social media, it can be difficult for the street team representatives to show customers and retailers the new products with the most up-to-date information because the product is still being manufactured.

- * Often the data and images for the products are out of date.

- * The internal sales team uses the Dynamics 365 Supply Chain Management product from to show this information to customers.

- * For questions about bike-specific warranties and service level agreements, consumers can contact Adventure Works Cycles directly through the active Adventure Works Cycles social media pages. The company expansion will put a strain on the manual interactions of answering questions.

- * Information and attributes change often.

International compliance

Sales are currently restricted to the US only.

Requirements

General

No coding is in scope for the project.

- * Change management operations need to be implemented.

- * A One Version strategy needs to be implemented.

- * The most critical business processes must never break when the software updates to the newest version.

- * No third-party testing tools will be used. Adventure Works Cycles wants to use everything in the Microsoft stack if there is an option available.

- * Because the company is at capacity with the overwhelming demand, the testing process must be done without users running through the processes every time the software updates.

- * With the different bike configurations, Adventure Works Cycles would like to use a single business process but test against 10 different data configurations to streamline errors against data variations in the manufacturing process.

Data administrator

- * A single person, the Adventure Works Cycle data administrator, will be tasked with owning all reporting and data tasks.
- * This one person will need to intimately know all entities and fields, in addition to any changes in the new versions of the software.
- * Adventure Work Cycles users will inquire with the data administrator about certain data they need to view.

The data administrator needs to quickly search data entities by field names and advise users on how to extract data into their own Excel templates for ad hoc reporting and data management tasks.

Data migration

- * The data cleansing and loading into Dynamics 365 will be done by the Adventure Works Cycles data administrator.
- * With the many changes for the products and data, imports for the data loads must be repeatable and consistent.
- * The different data loading components will all be done at one time.
- * After the import order and cadence is done correctly in a test environment, that same process must be reliably replicable for the golden configuration, in addition to any environment refreshes going forward.
- * Any errors on the data loading must identify the issue for the person to address and fix for future loads.

Sales

- * The sales street team must be able to view and edit (only product descriptions) near real-time information from the Dynamics 365 system about products on their personal mobile phones.
- * No street team representatives will have access to the Dynamics 365 Supply Chain Management application, but they must be able to enter orders and update customer information into the system without Adventure Works Cycles assistance.
- * The Adventure Works Cycles internal sales support team must be able to see all street team sales orders entered to provide support, but the internal team should not see any information around the commissions configured on the orders.
- * The sales support team must be able to see all orders and fields for the different sales teams. No other security differences from a Dynamics perspective are needed.

Products

- * Warranty and Service Level Agreements stored in Dynamics 365 for the different products must not be exposed directly to sales representatives.
- * The representatives must be able to pose questions from customers and retailers and get answers back almost immediately.
- * Any opportunity to extend this type of product inquiry and support mechanism to customers and retailers must be evaluated.
- * The data for all of the product information must be easily extractable back into Excel.

International compliance

- * Payments and invoices inbound and outbound must be converted or translated to the correct localized format
- * Regardless of regulatory compliance, the customer-facing business documents must have a unique template for each country that can be designed within Microsoft Office applications. These documents must be embedded in Dynamics 365 forms for data export and configurable by non-developers.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a file-based integration to Dynamics 365 Finance.

Microsoft Excel files with 15,000 or more records need to be imported into the system periodically by individual users. The records need to be imported in full within a 5-minute approved window.

You need to determine how to accomplish the import into the system.

Solution: Import the data by using the Data Management Framework's package API.

Does the solution meet the goal?

A. Yes

B. No

Topic 4, Adventure Works Cycle

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam.

You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Current environment

Adventure Works Cycles is a high-end bicycle manufacturer in North America founded in 2010. The company has standard bicycles available year round in addition to limited-edition bicycle models released domestically several times per year to boutique retailers.

The limited-edition bicycles are the most successful. They have high margins, are in high demand, and have a fervent following with the younger bicycle community that wants to make a social statement. Most consumers become aware of the other Adventure Works Cycles bicycles through these limited editions.

Adventure Works Cycles wants to triple its manufacturing capabilities and expand to countries/regions in South America, Western Europe, and United Arab Emirates (UAE) over the next few years.

General

To facilitate these expansions, Adventure Works Cycles has decided to invest in Dynamics 365 Finance, Dynamics 365 Supply Chain Management, and the Power Platform products to digitally innovate from a custom-built enterprise resource plan (ERP), and Microsoft Excel worksheets. Adventure Works Cycles sells only to North America and Canada but still cannot keep up with current demand. Over time, market expansion will be the only way to remain profitable.

Expansion has been limited in the past due to legal requirements and regulations around document formatting and the lack of a developer.

Adventure Work Cycles has no capabilities or budget to undertake any development past the Excel formula-level tasks.

There are no formal change management procedures.

Sales

There are three distinct sales teams:

An internal sales team (B2B)

- Sells to retailers.
- Submits orders via EDI, email, or call-in.

A street sales team (B2C)

- Sells directly to high profile or social media influencer consumers.
- Provides customers with discounts or has marketing arrangements in exchange for driving sales to retailer-direct sales channels
- Submits orders by using email or call-in because pricing and terms must be negotiated.

An Adventure Works Cycles administrative sales team

- Has same responsibilities and activities as the internal sales team.
- Coordinates the management activities of the B2B and B2C teams.

Products

Before new bike models are unveiled through social media, it can be difficult for the street team representatives to show customers and retailers the new products with the most up-to-date information because the product is still being manufactured.

Often the data and images for the products are out of date.

The internal sales team uses the Dynamics 365 Supply Chain Management product from to show this information to customers.

For questions about bike-specific warranties and service level agreements, consumers can contact Adventure Works Cycles directly through the active Adventure Works Cycles social media pages. The company expansion will put a strain on the manual interactions of answering questions.

Information and attributes change often.

International compliance

Sales are currently restricted to the US only.

Requirements

General

No coding is in scope for the project.

Change management operations need to be implemented.

A One Version strategy needs to be implemented.

The most critical business processes must never break when the software updates to the newest version.

No third-party testing tools will be used. Adventure Works Cycles wants to use everything in the Microsoft stack if there is an option available.

Because the company is at capacity with the overwhelming demand, the testing process must be done without users running through the processes every time the software updates.

With the different bike configurations, Adventure Works Cycles would like to use a single business process but test against 10 different data configurations to streamline errors against data variations in the manufacturing process.

Data administrator

A single person, the Adventure Works Cycle data administrator, will be tasked with owning all reporting and data tasks.

This one person will need to intimately know all entities and fields, in addition to any changes in the new versions of the software.

Adventure Work Cycles users will inquire with the data administrator about certain data they need to view. The data administrator needs to quickly search data entities by field names and advise users on how to extract data into their own Excel templates for ad hoc reporting and data management tasks.

Data migration

The data cleansing and loading into Dynamics 365 will be done by the Adventure Works Cycles data administrator.

With the many changes for the products and data, imports for the data loads must be repeatable and consistent.

The different data loading components will all be done at one time.

After the import order and cadence is done correctly in a test environment, that same process must be reliably replicable for the golden configuration, in addition to any environment refreshes going forward.

Any errors on the data loading must identify the issue for the person to address and fix for future loads.

Sales

The sales street team must be able to view and edit (only product descriptions) near real-time information from the Dynamics 365 system about products on their personal mobile phones.

No street team representatives will have access to the Dynamics 365 Supply Chain Management application, but they must be able to enter orders and update customer information into the system without Adventure Works Cycles assistance.

The Adventure Works Cycles internal sales support team must be able to see all street team sales orders entered to provide support, but the internal team should not see any information around the commissions configured on the orders.

The sales support team must be able to see all orders and fields for the different sales teams. No other security differences from a Dynamics perspective are needed.

Products

Warranty and Service Level Agreements stored in Dynamics 365 for the different products must not be exposed directly to sales representatives.

The representatives must be able to pose questions from customers and retailers and get answers back almost immediately.

Any opportunity to extend this type of product inquiry and support mechanism to customers and retailers must be evaluated.

The data for all of the product information must be easily extractable back into Excel.

International compliance

Payments and invoices inbound and outbound must be converted or translated to the correct localized format Regardless of regulatory compliance, the customer-facing business documents must have a unique template for each country that can be designed within Microsoft Office applications. These documents must be embedded in Dynamics 365 forms for data export and configurable by non-developers.

You are a Dynamics 365 for Finance and Operations system administrator.

The finance department is experiencing electronic reporting submittal issues. You must use all available sources to troubleshoot those issues.

You need to identify potential hotfixes.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a Dynamics 365 interface with a list of actions on the left and an empty answer area on the right. The actions are: Log in to Lifecycle Services (LCS), Use the Issue search tile, Select a project to work in, Enter the issue case number, Enter search terms, and Create a new case. The answer area is empty and has a dashed border. There are navigation arrows on the right side of the answer area.

Answer:

The screenshot shows the same Dynamics 365 interface, but the answer area now contains four actions in the correct sequence: Enter search terms, Use the Issue search tile, Log in to Lifecycle Services (LCS), and Create a new case. The actions are arranged in a sequence from top to bottom, with a dashed border around the entire answer area. There are navigation arrows on the right side of the answer area.

You are tasked with setting up Case management in the Dynamics 365 for Finance and Operations deployment for your organization.

Your organization must use cases to track defect and enhancement reports for products, so that engineers can improve products over time. Only appropriate employees within the organization should have access to cases and related information.

- * Call center employees create thousands of service cases and ensure that the proper resources are allocated for each service.
- * Service department employees fix cases created by the call center and create cases for defects and enhancement suggestions when they identify them.
- * Engineers review the cases from the service department while planning and designing the next version.

You need to configure the tool to enable tracking of service cases and product defects and enhancements.

Which Case management settings should you choose for each category or categories? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

A company implements Dynamics 365 for Finance and Operations. It sets up and configures the system to support reporting requirements using Microsoft Power BI.

The customer service manager wants to create reports in Power BI for analyzing customer order patterns, order fulfillment metrics, customer satisfaction KPIs, and customer service representative goal metrics. These reports compare aggregated information across multiple demographic regions and business lines for current trends against historic information.

The manager would like to use the reports to make individual team performance more visible to the managerial and executive teams. Since reports will be used by those teams as well as mobile users, the manager would like the report response to reflect the latest data without requiring the user to wait.

You need to determine which tool or functionality best fits the scenario.

Which feature or functionality should you use? To answer, select the appropriate feature or functionality in the dialog box in the answer area.
